DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-23, 23, 25, drawn to a distributor plate having a single wear element being positioned on the body alone cover an outer surface of the body onto which the material would otherwise received.

Group II, claim 14, drawn to a distributor plate having a wear element is attached to the body by use of an adhesive substance.

Group III, claim 15, drawn to a distributor plate having a basal spigot.

Group IV, claim 16, drawn to a distributor plate having a beveled peripheral edge for insertion of a levering tool.

Group V, claims 17-18, drawn to a distributor plate having a wear element includes a projection which locates the wear element on the body.

Group VI, claims 19-22, 24 and 26, drawn to a mounting for supporting a distributor plate, with the distributor plate having multi-sided basal spigot receivable in a multi-sided recess in the mounting, wherein the number of sides of the recess is multiple greater than one of the number of sides of the spigot.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The inventions of Groups II-IV and VI do not require "a single wear element being positioned on the body alone cover an outer surface of the body onto which the material would otherwise received" as evidenced in claim 1 of Group I. The invention of Group I does not require "a wear element includes a projection which locates the wear element on the body" as claimed in claim 17 of Group V. The invention of Group II does not require a basal spigot as claimed in Group III. The invention of Group III does not require a

beveled peripheral edge as claimed in Group IV. The invention of Group IV does not require a wear element with a projection as claimed in Group V. The invention of Group V does not require a mounting and a multi-sided spigot as claimed in Group VI.

A telephone call was made to Attorney Needham James Boddie on January 02, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JIMMY T. NGUYEN whose telephone number is (571)272-4520. The examiner can normally be reached on Monday-Thursday 7:30am-5:00pm with alternating Fri. 7:30am-4:00pm.
